

DEVELOP PYTHON SCRIPT

PROJECT TITLE	IoT based safety gadget for Child Safety Monitoring and Notification
TEAM ID	PNT2022TMID03538
SUBMISSION DATE	17 November 2022

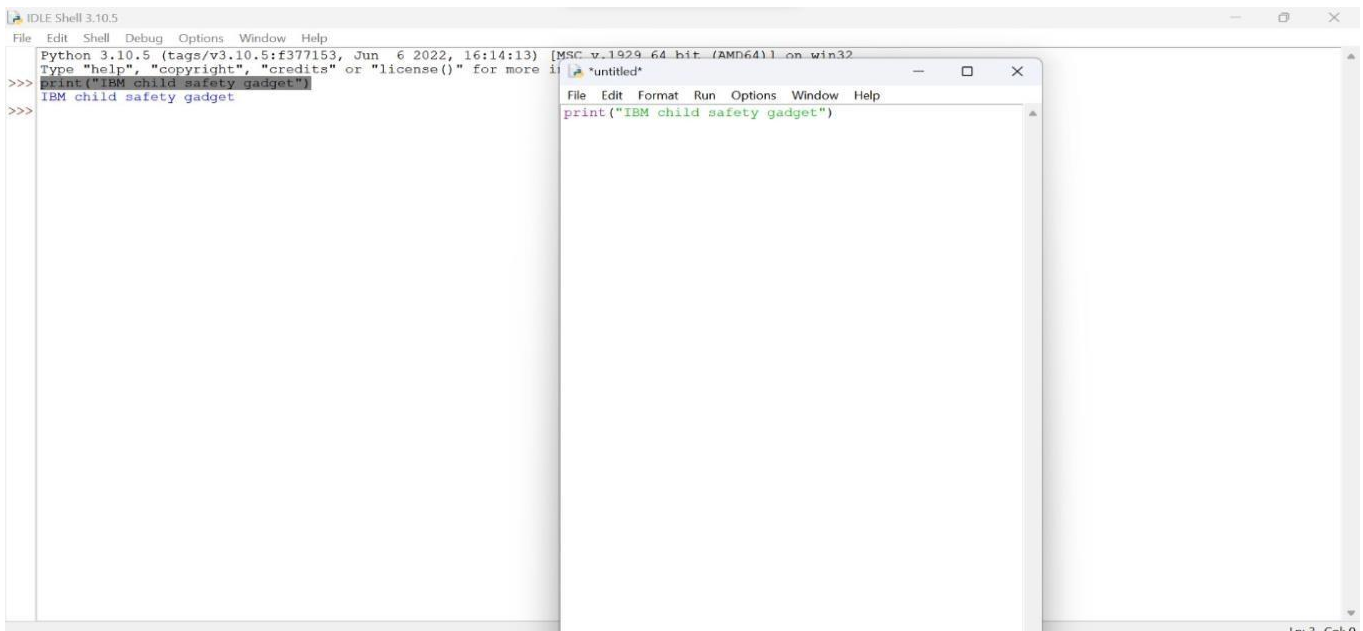

STEP 1:

The screenshot shows the IDLE Shell 3.10.5 interface. The menu bar includes File, Edit, Shell, Debug, Options, Window, and Help. The shell window displays the following text:

```
Python 3.10.5 (tags/v3.10.5:f377153, Jun 6 2022, 16:14:13) [MSC v.1929 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> print("IBM child safety gadget")
IBM child safety gadget
>>>
```

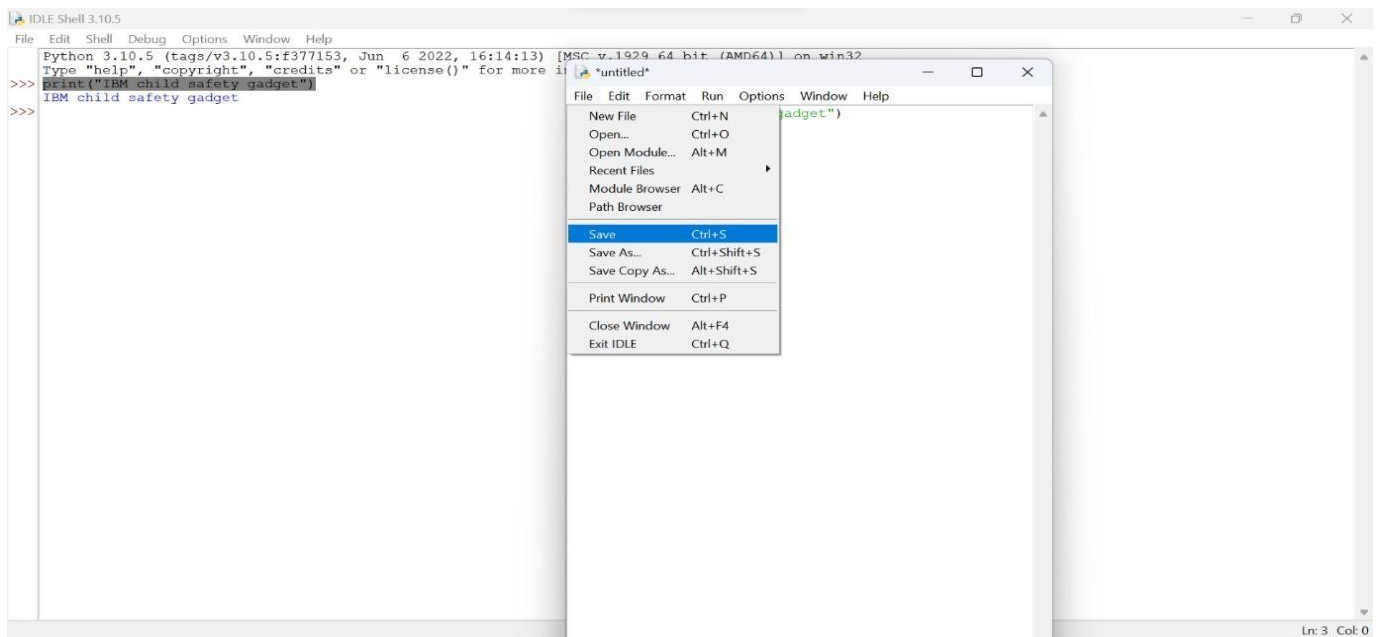

STEP 2:

The screenshot shows two windows. The background window is the IDLE Shell 3.10.5, displaying the same Python script execution as in Step 1. The foreground window is an untitled editor window with the following menu bar: File, Edit, Format, Run, Options, Window, Help. The editor contains the following code:

```
print("IBM child safety gadget")
```

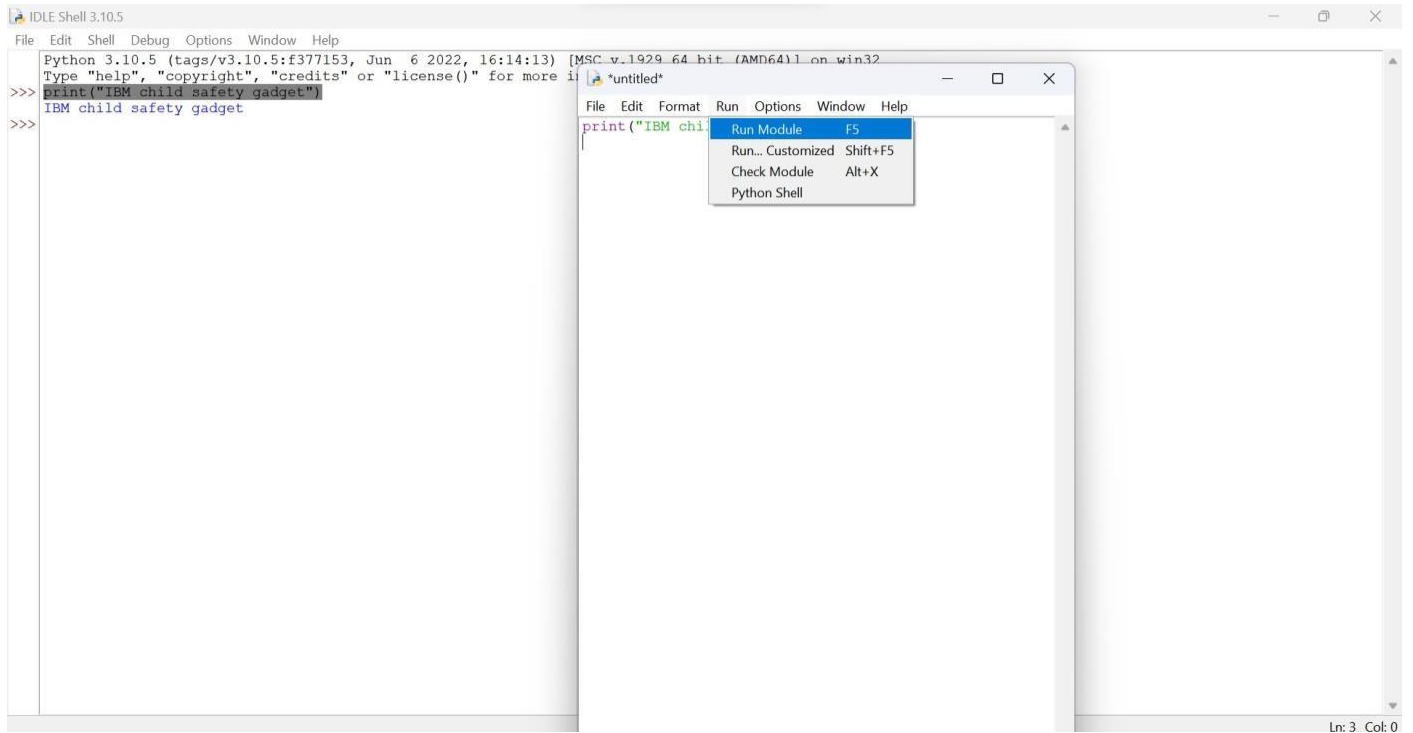

STEP 3:

STEP 4:

STEP 5:

STEP 6:
